

Amendments to the Claims

This listing of claims will replace all prior versions of claims in the application.

1-7. (canceled)

8. (new) An image display apparatus comprising an image display panel and a supporting plate to which a back surface of said image display panel is removably fitted, wherein a thermally conductive sheet is sandwiched between said image display panel and said supporting plate, and at least one adhesive tape having sufficient bonding strength for holding said panel during use of said image display apparatus and capable of being peeled from said plate when pulled at an end portion thereof is bonded to a surface of said supporting plate not occupied by said thermally conductive sheet, optionally wherein said image display panel is a plasma display panel.

9. (new) An image display apparatus according to claim 8, wherein said supporting plate comprises a heat-dissipating material.

10. (new) An image display apparatus according to claim 9, wherein said heat-dissipating material is aluminum or its alloy.

11. (new) An image display apparatus according to claim 8, wherein said thermally conductive sheet comprises a removable sheet material.

12. (new) An image display apparatus according to claim 9, wherein said thermally conductive sheet comprises a removable sheet material.

13. (new) An image display apparatus according to claim 8, wherein said adhesive tape and said thermally conductive sheet are alternately bonded to a surface of said supporting plate.

14. (new) An image display apparatus according to claim 9, wherein said adhesive tape and said thermally conductive sheet are alternately bonded to a surface of said supporting plate.

15. (new) An image display apparatus according to claim 10, wherein said adhesive tape and said thermally conductive sheet are alternately bonded to a surface of said supporting plate.

16. (new) An image display apparatus according to claim 11, wherein said adhesive tape and said thermally conductive sheet are alternately bonded to a surface of said supporting plate.

17. (new) An image display apparatus according to claim 8, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

18. (new) An image display apparatus according to claim 9, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

19. (new) An image display apparatus according to claim 10, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

20. (new) An image display apparatus according to claim 11, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

21. (new) An image display apparatus according to claim 12, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

22. (new) An image display apparatus according to claim 13, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

23. (new) An image display apparatus according to claim 14, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

24. (new) An image display apparatus according to claim 15, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.

25. (new) An image display apparatus according to claim 16, wherein said adhesive tape is applied to a peripheral end portion of said supporting plate.
